ATTN: Mr. Doug Zollinger

RE: Ammonia Refrigeration Still.

Dear Doug:

I would like to take this opportunity to thank you personally, as well as all of the members of your team at Wagner-Meinert Inc. for your assistance recently in the installation of the Ammonia Still at our facility.

The issue we were experiencing, water contamination, appears to be completely remedied. The automatic distillation and removal of water from our system has increased the effectiveness of our evaporators.

We are please that we selected the Wagner-Meinert Inc. designed still. The additional benefits we have received have been tremendous. Our Refrigeration Operators and Maintenance Technicians no longer are required to drain oil from the oil pots in our system. By using the Still, the oil is removed automatically. Given the potential hazards of oil draining (ammonia release, product contamination, production interruption, etc.) the ammonia still is wonderful. The automated removal process eliminated potential hazards to our employees.

Again thank you, for your assistance,

**Larry Dues
Maintenance Manager**
