Product Identifier: ASI 502 Almond

Recommended Use: Adhesive, binding agents

Restrictions on Use: None known

Section 2: Hazard(s) Identification

GHS Classification: Not a hazardous substance or mixture.

Acute Effects: No information on significant adverse effects.

Delayed Effects: No information on significant adverse effects.

Indication of Immediate Medical Attention and Special Treatment

Needed, If Needed: Treat symptomatically and supportively.

GHS Label Elements

Symbol(s): None.
Signal Word: None.
Hazard Statement(s): None known.

Precautionary Statement(s)

Prevention: Use only outdoors or in a well-ventilated area.

Response: None known.

Storage: Keep in properly labeled containers.

Store in accordance with the particular national regulations.

Disposal: Dispose of contents/container in accordance with

local/regional/national/international regulations.

Product Identifier: ASI 502 Almond

Document #: SDS 053

Revision: 1

Section 3: Composition/Information on Ingredients

CAS	Component	Percent
7631-86-9	Silicon dioxide	≥5 - <10
64742-46-7	Distillates (petroleum), hydrotreated middle	≥5 - <10
13463-67-7	Titanium dioxide	≥0.1 - <1
1333-86-4	Carbon black	≥0.1 - <1

Section 4: First-Aid Measures

Inhalation: IF INHALED: Remove to fresh air.

Get medical attention if symptoms occur.

Skin Contact: IF ON SKIN: Wash with soap and water as a precaution.

Get medical advice/attention if symptoms occur.

Eye Contact: IF IN EYES: Flush eyes with water as a precaution.

If eye irritation develops and persists: Get medical advice/attention.

Ingestion: If swallowed, DO NOT induce vomiting.

Get immediate medical attention if symptoms occur.

Rinse mouth thoroughly with water.

Section 5: Fire-Fighting Measures

Suitable Extinguishing Media: Use carbon dioxide, regular dry chemical, alcohol-resistant foam or

water spray.

Unsuitable Extinguishing Media: None known.

Specific Hazards Arising from the Chemical

Hazardous Decomposition Products: Upon decomposition, this product emits carbon oxides, silicon

oxides, and formaldehyde.

Special Protective Equipment and

Precautions for Firefighters: Exposure to combustion products may be a hazard to health.

Firefighters should wear full-face, self-contained breathing apparatus

and impervious protective clothing.

Specific extinguishing methods: Use extinguishing measures that are appropriate to local

circumstances and the surrounding environment.
Use water spray to cool unopened containers.

Remove undamaged containers from fire area if it is safe to do so.

Evacuate area.

Section 6: Accidental Release Measures

Personal Precautions, Protective Follow safe handling advice and personal protective equipment

Equipment and Emergency Procedures: recommendations.

Environment Precautions: Avoid release to the environment. Prevent further leakage or

spillage if safe to do so. Retain and dispose of contaminate wash water. Local authorities should be advised if significant spillages

cannot be contained.

Methods and Materials for Containment

and Cleaning Up:

Absorb with inert absorbent material.

For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent.

Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations

are applicable.

Section 7: Handling and Storage

Precautions for Safe Handling

Protective Measures: Handle in accordance with good industrial hygiene and safety practice.

Take care to prevent spills, waste and minimize release to the

environment.

Use only with adequate ventilation.

Advice on General Occupational

Hygiene:

Do not eat, drink, or smoke when using this product.

Wash thoroughly after handling.

Wash contaminate clothing before reuse.

Conditions for Safe Storage, including

any Incompatibilities:

Store and handle in accordance with all current regulations and

standards. Keep in properly labeled containers. Keep separated from incompatible substances.

Incompatibilities: Strong oxidizing agents

Appropriate Engineering Controls: Processing may form hazardous compounds (see section 10).

Ensure adequate ventilation, especially in confined areas.

Minimize workplace exposure concentrations.

Ensure that eye flushing systems and safety showers are located close

to the working place.

Individual Protection Measures

Eye/Face Protection: Wear safety glasses.

Skin Protection: Skin should be washed after contact.

Hand Protection: Wash hands before breaks and at the end of workday.

Respiratory Protection: General and local exhaust ventilation is recommended to maintain

vapor exposures below recommended limits. Where concentrations are above recommended limits or are unknown, appropriate respiratory protection should be worn. Follow OSHA respirator regulations (29 CFR 1910.134) and use NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against exposure to any hazardous chemical is limited. Use a positive pressure air supplied respirator if there is any potential for uncontrolled release, exposure levels are unknown, or any other circumstance where air

purifying respirators may not provide adequate protection.

Advice on General Occupational

Hygiene:

When using do not eat, drink, or smoke. Wash contaminated clothing before re-use.

These precautions are for room temperature handling. Use at elevated

temperature or aerosol/spray applications may require added

precautions.

Revision: 1

Reactivity: Not classified as a reactivity hazard.

Chemical Stability: Stable at normal temperatures and pressure.

Possibility of Hazardous Reactions: Use at elevated temperatures may form highly hazardous compounds.

Can react with strong oxidizing agents.

Acetic acid is formed upon contact with water or humid air.

When heated to temperatures above 150 °C (300 °F) in the presence of

air, trace quantities of formaldehyde may be released. See OSHA formaldehyde standard, 29 CFR 1910.1048

Hazardous decomposition products will be formed at elevated

temperatures.

Conditions to Avoid: None known.

Incompatible Materials: Oxidizing agents

Hazardous Decomposition Products: Upon decomposition, this product emits carbon oxides, silicon oxides,

and formaldehyde.
